

## AMERICOAT® ePlus Glaze

AMERICOAT® ePlus silicone release coating is the industry's leading silicone coating technology used on all Chicago Metallic glazed pans. AMERICOAT ePlus is a clear glaze that reduces the need for secondary release agents such as oil, silicone, or paper by up to 50% and offers long-lasting performance with approximately 300 to 600 releases\* achieved before recoating is required.

### Safe for Food Contact

AMERICOAT is a silicon-based, non-stick, and non-toxic coating that is responsibly manufactured and derived from naturally occurring minerals. AMERICOAT complies with all relevant FDA, EU, and other known regulations for food contact.

### Save Money with Pan Refurbishment

Even with proper care and cleaning, your pans will eventually need to be refurbished. That is why, through our sister company, Pan Glo®, we offer The Pan Glo Process. Every year, millions of baking pans of every shape, size, brand, and configuration are processed by Pan Glo plants around the world. These cleaned and freshly reglazed pans are returned to productivity with improved release characteristics, time and time again. Refurbishment costs less than purchasing new pans and saves money due to the decreased need for release agents.

We have 18 facilities across North America to better serve your straightening, cleaning, and coating needs. For more information, please call 800.652.2151 (USA), 800.265.8445, ext. 239 (Canada), or +52 728 285 3802 (Mexico), or visit [panglo.com](http://panglo.com).

\*Note that this is an approximate number and may not be the exact number of releases achieved.
